Abstract of the Disclosure

Provided is a gas generating composition having a low combustion temperature and having a low produced amount of toxic carbon monoxide, ammonia and nitrogen oxides at the time of combustion. The gas generating composition includes the following components (a), (b) and (c) and optionally the component (d) and/or the component (e): (a) an organic compound as fuel; (b) an oxygen-containing oxidizing agent; (c) aluminum hydroxide; (d) a binder; and (e) an additive selected from metal oxides and metal carbide.
